WHY THIS MATTERS

For Ronil. For every child. *For a cure.*

In January 2016, our founders' son Ronil was diagnosed with diffuse intrinsic pontine glioma (DIPG), a rare and aggressive pediatric brain cancer, at age 12.

He faced the next 31 months with extraordinary courage, staying the curious, fun-loving kid he always was.

When he passed in September 2018, his family donated his tumor to Stanford for research as his final wish, so that future children might have a better chance. His legacy inspired our founders to launch the Brave Ronil Foundation (BRF) in 2026.

8%

Brain cancer is the **leading cause of cancer death in children**, yet only 8% of federal cancer research funding goes to pediatric cancer.

Sources: National Cancer Institute; SEER, National Cancer Institute.

FOR CHILDREN WITH DIPG

No approved
treatment.
No cure.

Our Mission

The Brave Ronil Foundation exists so that no family faces pediatric brain cancer alone. We will fund promising research, support families through diagnosis and treatment, and raise awareness and advocate for change so future children have hope where today there is none.

Our founders' prior work

Before BRF, our founders' nonprofit work helped raise **\$450,000+**, directed to **8 research projects** at **10+ institutions**, and supported **50+ families**. The Golden Gala funds BRF's next chapter.

Your sponsorship launches BRF's mission at its very first gala.
